

Las Cruces Utilities Department

Strategic Business Plan

<i>Mission Statement</i>
The mission of the Las Cruces Utilities Department is to provide natural gas, water, wastewater, and solid waste services to ratepayers, so they can enjoy a safe, healthy, productive, and sustainable environment.
<i>Issue Statements</i>
<u>Issue 1</u> The aging condition of the City’s utilities services infrastructure including natural gas, water, wastewater, and solid waste, combined with a lack of a strategic replacement plan, if not addressed, will result in: <ul style="list-style-type: none">• An increase in line breaks and failures.• Overall increased disruption of utilities services.• Increased risk to public safety and health.• Increased utility rates due to the increased frequency and cost of emergency repairs.• Increased disruption of traffic due to an inability to plan and execute projects.
<u>Issue 2</u> The lack of compliance with water conservation ordinances and regulations by institutions including public schools, hospitals, and the City of Las Cruces, if not addressed will result in: <ul style="list-style-type: none">• Increased amounts of wasted water running down the streets.• Increased cost of water to ALL customers due to wasteful practices.• Some institutions not setting an example of conserving water.
<u>Issue 3</u> The current regional water conflict between Texas v. New Mexico and Colorado regarding water allocations from the Rio Grande, if not resolved successfully for the City of Las Cruces will result in: <ul style="list-style-type: none">• Increased water rates directly affecting customer’s ability to pay utility bill.• Unknown federal control over our water.• Historic water planning becoming null and void.• Potential limits on personal and business water consumption.• Limits on economic development due to regulatory restrictions and cost of water.

NOTE: ISSUE STATEMENT #3, IT IS NOT ALIGNED TO A STRATEGIC RESULT, BUT IT IS CRUCIAL TO COMMUNICATE AS PART OF THE PLAN.

Issue 4

The lack of an effective Las Cruces Utilities Communications Plan for customers, if not addressed will result in:

- An increased risk of customers not calling in potential emergency situations.
- Lower community participation at public input events.
- A lack of understanding of services provided by the department and the corresponding value of those services.

Issue 5

The continued inability to recruit, develop, and retain a qualified workforce which, if not addressed will result in:

- Decreased ability to meet demand or growth resulting in extended service interruptions and delayed response to customer issues.
- Increased probability of damage to private property and public infrastructure.
- Increased risk to public health and safety including serious illness.
- An increased need to outsource services.
- Loss of consumer confidence in the department and City government.

Issue 6

The continued unmet demand for natural gas service and the failure to expand the natural gas service territory, if not addressed, will result in:

- Limited energy choices for customers (propane or electric).
- Higher residential energy costs.
- A negative perception of the department's ability to service customers.
- A missed opportunity to lower customer energy costs.
- Lost revenue and market share opportunities.

Issue 7

The increasing population and its demand on our resources, coupled with same-day service policies that have been implemented without corresponding increases in resources, if not addressed, will result in:

- Delays in reactivation of services after a line break or termination of services.
- Delays in new activation of services.
- Delays in customer service.
- Decreased ability to provide overall quality services to the customer.
- Increased customer frustration and dissatisfaction.
- Greater risk to public safety.

Issue 8

The lack of timely and effective internal support from Fleet, HR, and IT, if not addressed, will result in:

Fleet:

- Increased costs associated with renting equipment due to extended delays in repairs.
- Excessive delays for simple preventative maintenance.
- Increased costs due to lack of heavy and specialized equipment mechanics.

HR:

- Excessively long hiring process.
- Ratio of analyst to hiring manager is inadequate.
- Some associates are overworked due to vacancies.
- Inability to hire best and most qualified personnel due to non-flexibility with education vs. experience.
- Inability to recommend entrance pay.
- HR dictating process instead of what we need.

IT:

- Network outages lowers the ability of providing quality customer service for utilities customers.
- Slow response to work orders reduces productivity.
- Upgrades without prior testing causing slow and loss of connectivity in Utilities facilities.
- Inadequate process to review and approve outside software lowers productivity of Utilities associates.
- Upgrades to server knocks out Supervisory Control And Data Acquisition (SCADA) and jeopardizes system operations.
- Slower connectivity in Utilities facilities.

Strategic Results

Strategic Result 1

Looking ahead to the next half century, Las Cruces ratepayers can be assured that critical infrastructure and equipment necessary for the delivery of essential utilities services including natural gas, water, wastewater, and solid waste services, will be replaced, and maintained on schedule, as evidenced by:

- By July 1, 2019, replacement and rehabilitation of critical water well infrastructure will begin.
- By July 1, 2021, rehabilitation of water reservoirs' infrastructure will begin.
- By July 1, 2021, critical water pipeline infrastructure replacement will begin.
- By July 1, 2021, critical high-pressure natural gas line infrastructure replacement will begin.
- By July 1, 2022, replacement and rehabilitation of essential solids handling infrastructure will begin.
- By July 1, 2022, critical low-pressure natural gas line infrastructure replacement will begin.
- By July 1, 2022, critical wastewater collection system replacement and rehabilitation will begin.
- By July 1, 2023, year over year solid waste equipment and vehicles will be replaced on schedule.

Aligned with Issue Statements 1, 7, 8

Strategic Result 2

The Las Cruces Utilities Department will be viewed and treated as a customer by the City's central support functions as evidenced by:

- By July 2019, regular Fleet preventative maintenance will be completed within three hours.
- By July 2019, a Human Resources function within the Las Cruces Utilities Department will be established.
- By January 1, 2020, 60% Las Cruces Utilities Department vacancies will be filled within 6 weeks of date of request.
- By January 1, 2020, a streamlined promotion process within Las Cruces Utilities Department programs will be established.
- By July 2020, 95% of the training support necessary for certification will be provided to the Las Cruces Utilities Department.
- By July 1, 2020, Las Cruces Utilities will implement a Succession Plan at all levels within the department.
- By 2022, 75% vehicle repairs will be completed within one week. Specialized equipment will be repaired within two weeks.

Aligned with Issue Statements 5, 8

Strategic Result 3

Las Cruces ratepayers will continue to benefit from the department's safe utility practices and contribute to recycling and green waste best practices that help maintain their utility infrastructure as, evidenced by:

- By February 2019, the Las Cruces Utilities Board (Utilities Board) will review an action plan to implement the 40-year water plan over the next five years through 2024.
- Beginning in 2020, 85% annual survey respondents will report that they know who to call or what to do when they smell natural gas.
- Beginning in 2020, 85% annual survey respondents will report that they know what materials they should and should not put down their drain or flush.
- By 2020, the Las Cruces Utilities Department will increase its intake of green waste tonnage by 7% from 2,800 tons to 3,000 tons.
- By 2020, 20% institutional customers will reduce their water usage by an average of 2% following the program's outreach intervention.
- By 2020, all restaurant businesses that fail their inspection due to fat, oil, and grease disposal will be reduced by 50% from 52 to 26.
- By 2020, diversion rates of all recyclable waste will be maintained at an average rate of 23% or higher.

Aligned with Issue Statements 2, 4

Strategic Result 4

An increasing proportion of ratepayers located within the Las Cruces Utilities Department's service area will reduce their energy costs, and the Las Cruces Utilities Department will maximize its share of the natural gas market, as evidenced by:

- By December 2020, 80% developed areas in the northeast natural gas service area will have natural gas services available (east of I-25, north of Westmoreland).
- By 2023, 70% residents will live in areas that are served by natural gas.
- By 2023, 15% additional natural gas customers will be serviced through the Las Cruces Utilities Department.
- Beginning in 2023, the average size square foot home will save \$798.00 annually when moving from propane to natural gas.

Aligned with Issue Statements 4, 6

Strategic Result 5

High Performing Organization

- Beginning in 2019, 100% of department associates will know what is expected of them and how they align and contribute to the goals of the department as evidenced by their annual work plans and performance conversations being aligned with the department Strategic Business Plan.
- By 2019, 75% of City departments and agency partners will say they have a positive collaborative relationship with the Las Cruces Utilities Department that assists them in furthering their mission.
- By 2020, 80% of board, commission, and City Council members will report that they receive the information they need to make informed decisions.
